## PROFESSIONAL SUMMARY

Full Stack .NET Developer with nearly 2 years of professional experience building production-grade, multi-tenant SaaS platforms using ASP.NET Core, Angular, and Azure. Skilled in REST and GraphQL API design, Clean Architecture microservices, modular monoliths, and event-driven services using CQRS, MediatR, Redis, and RabbitMQ. Proven record in incident management, payment processing, and performance optimization, with active AI upskilling in Azure OpenAI and Semantic Kernel.

## TECHNICAL SKILLS

**Backend:** C#, ASP.NET Core (.NET 6 / 8 / 10), Web API, MVC, Entity Framework Core, LINQ, Blazor, ASP.NET Aspire  
**Frontend:** Angular (14 / 22), Module Federation, TypeScript, RxJS, HTML, CSS  
**Architecture and APIs:** Clean Architecture, Microservices, Modular Monolith, Multi-Tenancy, CQRS, MediatR, Event-Driven, Outbox Pattern, REST, GraphQL  
**Data and Messaging:** SQL Server, Azure SQL, PostgreSQL, Oracle, Redis, RabbitMQ  
**Cloud and DevOps:** Azure (App Service, Container Apps, AD, Blob Storage), Docker, Bicep (IaC), CI/CD, OpenTelemetry, IIS  
**Security and Testing:** Keycloak, JWT, OAuth 2.0, RBAC, HMAC, MSTest, Unit and Integration Testing  
**Tools and Practices:** Git, Visual Studio, Postman, Swagger / OpenAPI, Agile / Scrum

## PROFESSIONAL EXPERIENCE

**iTechOps - Ahmedabad, Gujarat, India** Nov 2024 - Present  
Full Stack .NET Developer

Software Development Intern | Jul 2024 - Nov 2024 - SaaS module development and bug fixes before converting to full-time.

- Architected and owned backend modules for a white-label SaaS monitoring platform, **cutting average incident downtime from 30+ minutes to under 5 minutes (6x MTTR improvement)**.
- Designed an **extensible alert-processing engine** with pluggable providers (Email, Slack, Teams), **handling 14,000+ alerts per month** with throttling, retries, and failure handling.
- Improved API and database performance by approximately 30 percent** via Entity Framework Core query optimization, strategic indexing, and N+1 elimination across multi-tenant SaaS workloads.
- Implemented **multi-tenant authentication and RBAC** using Keycloak, JWT, and Azure AD, **securing access for 5+ enterprise SaaS clients**.
- Built **Angular micro-frontend modules and Blazor interfaces**, integrating them with secured ASP.NET Core Web APIs and GraphQL endpoints.
- Resolved production incidents (alert misfires, IIS deployment failures, database deadlocks) through root cause analysis, with **zero client SLA breaches**.

## KEY PROJECTS

**White-Label Assessment Platform - Multi-Tenant SaaS** iTechOps  
.NET 10, GraphQL (HotChocolate), Clean Architecture, Microservices, Angular 22, Module Federation, JWT

- Developed backend services across a **distributed .NET 10 Clean Architecture microservices ecosystem**, exposing **GraphQL APIs via HotChocolate**, plus a REST credit-ledger service.
- Built **Angular 22 micro-frontend remotes using Module Federation**, composed into a single shell host with shared singleton services for auth tokens and tenant branding.
- Implemented **per-tenant and renderer isolation with JWT auth via a centralized Identity Service**, enabling **multiple vendor partners** to rebrand and resell the platform with full brand separation.

**Modular Monolith Payment Platform - FinTech SaaS** iTechOps  
.NET 8, ASP.NET Aspire, Blazor, CQRS, MediatR, EF Core, PostgreSQL, Redis, RabbitMQ, Keycloak, Docker, Azure Container Apps, Bicep, OpenTelemetry, MSTest

- Designed and implemented a **modular monolith payment platform spanning 15+ bounded-context domains** (Banking, Payments, Identity, Notifications) on ASP.NET Aspire, secured via **Keycloak with granular RBAC**.
- Engineered **distributed transaction reliability** using Redis for in-flight state management and **RabbitMQ with the Outbox Pattern** for guaranteed event delivery and failed-transaction recovery.
- Built **end-to-end open banking payment processing (PayIn and PayOut)** via SaltEdge with **HMAC-validated webhooks**, plus a **CQRS and MediatR KYC workflow** using Veriff for automated approvals.
- Deployed and maintained production on **Azure Container Apps using Docker, Bicep infrastructure-as-code, and CI/CD pipelines**, instrumented with **OpenTelemetry** tracing.
- Achieved **100% test suite conversion to MSTest** with unit and integration coverage across all 15+ modules.

## EDUCATION

**RK University - Rajkot, Gujarat, India** Oct 2020 - Jul 2024  
Bachelor of Technology (B.Tech), Information Technology | CGPA: 7.49 / 10.0

## AI ENGINEERING AND CERTIFICATIONS

**AI Skills:** Azure OpenAI, Semantic Kernel, RAG Pipeline Design, Prompt Engineering, AI-Assisted Development  
**Certifications:** Claude 101 (Anthropic) | Prompt Engineering for Everyone, SQL and Relational Databases 101 (IBM)
